HORIZON, ALONG WITH ANY OF ITS INTERFACES, CONVERTS YOUR PENTIUM® CLASS PERSONAL COMPUTER INTO THE MOST POWERFUL LIGHTING CONTROL SYSTEM AVAILABLE. HORIZON SOFTWARE RUNS UNDER WINDOWS™ 95, 98, NT AND 2000. ANYONE FAMILIAR WITH WINDOWS WILL FIND IT EASY TO BRING UP CHANNELS AND PROGRAM CUES WITH THE MOUSE. ANYONE FAMILIAR WITH COMMAND-LINE, TRACKING STYLE CONSOLES WILL FIND IT EASY TO PROGRAM USING KEYSTROKE SEQUENCES. A COMBINATION OF BOTH METHODS MAKES CUEING FAST AND EASY, NO MATTER WHAT YOUR LEVEL OF EXPERIENCE. THE LATEST VERSION OF HORIZON IS ALWAYS AVAILABLE ON CD-ROM OR VIA THE INTERNET, ENSURING THAT YOUR CONSOLE ALWAYS HAS THE LATEST TECHNOLOGY.

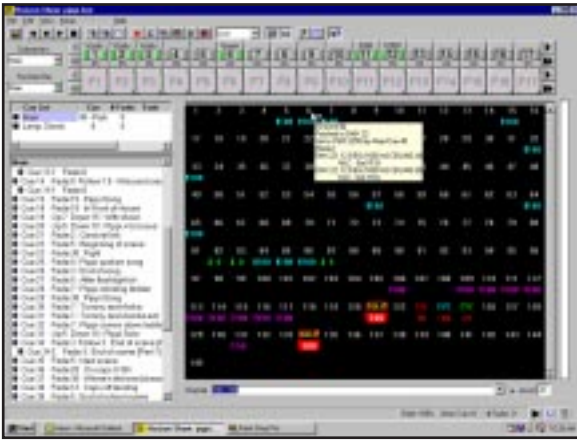

BASIC

Horizon Basic software provides all of the features standard on last action/tracking style consoles. In addition, it offers features not found elsewhere: three cue lists, allowing simultaneous playback of three different sequences of cues; plot and patch data import; and import of various elements from other Horizon shows. Unlimited Submaster pages and 24 Function buttons allow extensive customization. When used in conjunction with IPS dimmers, Horizon provides detailed dimmer feedback and allows you to set dimmer profiles from the console.

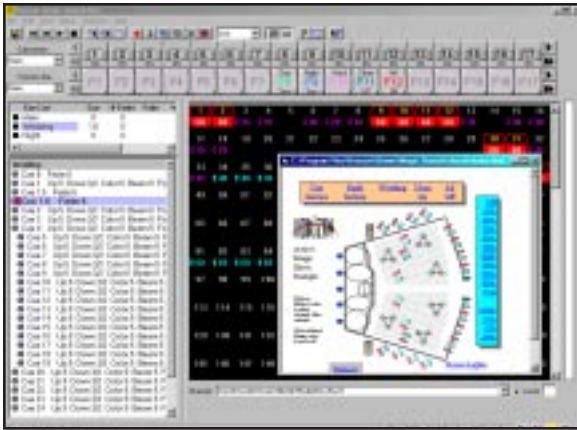

BASIC APPLICATIONS

Horizon Basic is simple enough for the uninitiated user who needs to control 24 dimmers, yet sophisticated enough for the regional theatre with 500 dimmers. A small venue can be easily served by a Horizon 512 Interface and Basic Software. Add a Submaster Wing Panel, and anyone can quickly bring up channels and program cues without extensive training. Need more than 512 channels? Use one or more 1024 Ethernet Nodes to get the channel capacity you need. Starting small, but planning to grow into more sophisticated features? Upgrade to Silver or Gold software at any time.

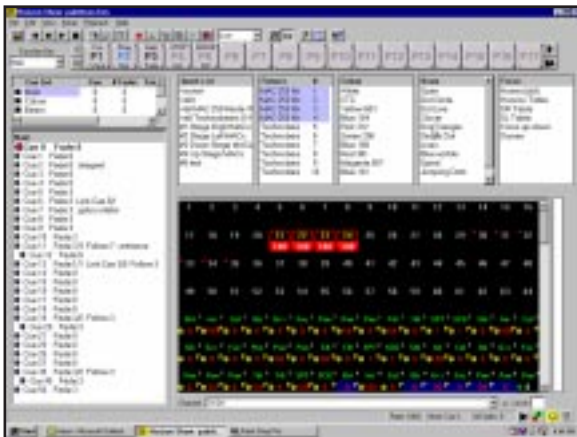

SILVER

The Silver Upgrade includes many professional level features. Active Magic Sheets™ allow you to pick fixtures, levels, and cues from an HTML display. An unlimited number of Cue Lists lets you play back several cues on stage at the same time, or run lights in multiple venues from one console. Channel labels allow you to replace numbers in the channel display with something more obvious, like names. Scheduled events run cues at specific times. A "What's This?" function displays patch, load & focus data imported from popular lighting management programs (SoftPlot, Lightwright, or WYSIPaper) for any channel you select.

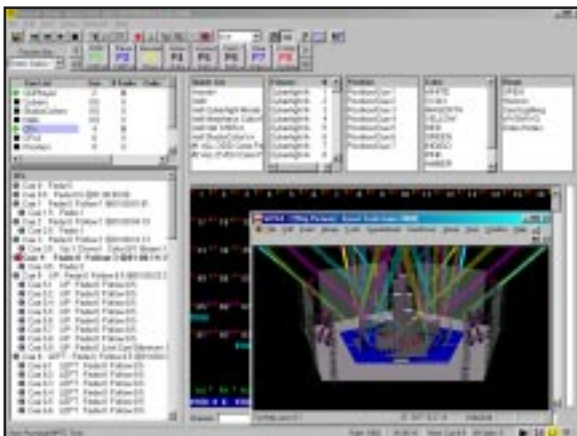

SILVER APPLICATIONS

Horizon Silver's Active Magic Sheets™ are perfect for those applications where you want a more intuitive interface. Set up the floor plan of the space as an HTML file, then point and click on each area to adjust light levels. Set up a series of buttons or pictures that activate cues or macros when selected with the mouse. Other Silver features – unlimited Cue Lists, scheduled events, MIDI/SMPTE options, unlimited Function Bars – make it perfect for architectural or "archetainment" lighting control.

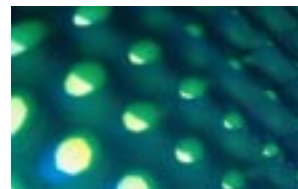

GOLD

This premium version of Horizon adds moving light control to the feature set of Horizon Silver. Over sixty fixture types are currently supported, and new ones are continually added to the library. New fixture definitions are available for free download on the Internet. Fixtures can be controlled using pop-up "Attribute" windows, or even more quickly using specialized cue lists called "Palettes" which allow you to pre-select fixtures, color attributes, beam attributes, effect wheel attributes, and preset focus positions to build cues quickly and easily.

GOLD APPLICATIONS

Gold software works with any Horizon interface to control from 512 to 7168 channels of intelligent fixtures. Horizon Gold also includes an interface to CAST Lighting's WYSIWYG software, so you can use both programs on one computer. As cues are programmed and played back using Horizon, you can see what is happening on the WYSIWYG display. WYSIWYG's AutoFocus™ system can generate preset focuses directly in WYSIWYG and automatically transfer them to Horizon. All of the cues for a show can be written and viewed before tech rehearsal.

HORIZON LETS YOU DESIGN
WHERE YOU WANT,
WHEN YOU WANT.
