

MARQUEE
PC SPECIFICATIONS

Computer and Processor:

Personal computer with an Intel Pentium IV 2.0-GHz or faster processor (or equivalent)

Memory:

1GB of RAM or greater

Hard Disk:

1GB of available hard-disk space

Drive:

CD-ROM or DVD drive

Display:

Super VGA (1024 x 768 minimum) or higher-resolution monitor
(The higher the resolution, the more channels and cues are visible at once,
1280 x 1024 recommended.)

Ports:

USB (For use with the Marquee USB Interface)
Ethernet (For remote system use, and output to Ethernet based lighting protocols such as Shownet, Pathport, and Art-Net.)

Supported Operating Systems:

Microsoft Windows® XP Pro (Recommended)
Microsoft Vista (32-Bit only, 64-Bit NOT supported.)

Software:

To insure system stability, Horizon Control Inc. recommends a Marquee PC be dedicated to lighting control functions. Software Installed on the machine is at user discretion. It is recommended that no applications other than Marquee to be running during use. This includes Anti-Virus software.
