Pittsburgh, PA, April 3, 2007 - Horizon Control Inc. is pleased to announce the addition of Gary Douglas to its software development team. Gary is one of those rare breeds of individual that can both write code and focus an ellipsoidal and is one of the foremost experts in our industry on advance network protocols. Representing Pathway Connectivity and serving along side other HCI members on ESTA's Control Protocols Working Group for seven years, Douglas was a formidable member of the teams that brought you ACN and RDM.

Horizon Control Inc is the designer of software for the Entertainment Technology Marquee and Strand Lighting Light Palette lighting control consoles.
